Over
8,000
cedars in
our retail
area!

We have
the right
cedars
for you!

We will not sell cedars shipped bare root even though they would cost us much less. The reason they have been shipped without dirt is to save on shipping costs. Once they arrive at their destination they are potted when time permits, further reducing their survival rate.

Our cedars are balled and burlaped or pot grown. This makes for a stronger plant and an unstressed root system. They have well established roots and are shipped with an undisturbed root ball, no exceptions. With proper watering you can expect a 100% survival rate along with quick growth. See our explanation video at saveonplants.ca

\$49.99 when buying 50 or more yards, \$54.99 when buying 20-49 yards and \$56.99 when buying 5-19 yards.

These are not "Sale" prices

Actually, we never have Sales. We believe in giving you the best prices everyday on all 1,000 plus varieties, straight forward - no gimmicks. The prices are guaranteed for the entire year. You never have to wait again for so called "Sales" on overpriced leftover end-of-season stock.

Finest quality, huge selection, great service and always at our best possible price.

All plants are subject to availability. Our goal is to maintain a full inventory of all plants for the entire season, however we expect some plants will sell out quickly. We have reserved the entire inventory of certain varieties with our growers so when they're gone, they're gone!

Don't miss out, shop early!
